

CIW Courseware

Official CIW Curriculum coursebooks include narrative instruction, technical term definitions, skills objective callouts, hands-on labs, study and assessment questions, review projects and real-world case studies. You can choose CIW courseware in printed format or electronic format (PDF).

CIW Supplemental Materials (online)

For each CIW course we provide supplemental materials for instructors and for students. Materials include files required to complete the coursework, as well as other optional elements.

Student materials include the following:

- Lab files used to complete the course labs
- Handouts
- Answers to student exercises and quizzes
- Appendixes with related information

Academic Student materials include the following:

- Lab files used to complete the course labs
- Appendixes with related information

Note: Activities, Optional Labs, Quizzes and the Course Assessment are not included in the Academic Student version. Students can obtain these elements and answers only from the instructor.

Instructor materials include the following:

- Course syllabi
- Implementation tables
- Lab files used to complete the course labs
- Handouts
- Answers to student exercises and quizzes
- Appendixes with related information
- PowerPoint Presentation

CIW Pre-Assessment (online)

We offer an online pre-assessment test that mirrors the number of questions and distribution of skills objectives covered on the high-stakes CIW JavaScript Specialist certification exam. The CIW Pre-Assessment helps students determine their existing skill levels and their preparedness to take the CIW JavaScript Specialist training courses. It also helps identify knowledge areas in which students need to focus their studies in order to pass the certification exam.

The CIW Pre-Assessment allows students to:

- Practice time management, because the test's time limit mirrors the certification exam's time limit
- Exit the test at any time (they must start over on their next attempt)
- Skip a question, flag it for review and return to it later
- Review all answers before getting the final score
- See which questions they missed, with correct answers and explanations
- Repeat the test as many times as needed within the subscription period
- See their scores in My Progress at the top of the page

CIW Course Mastery (online)

CIW Course Mastery is an online tool that delivers CIW course review questions. This tool is based on research in learning and memory, and it delivers an accelerated teaching solution that reduces training time and boosts retention of material in the learner's memory to provide 100-percent mastery of all content.

Students can use Course Mastery after each lesson to review the material, and identify the concepts that they understand and those that they still need to learn. For each question, Course Mastery asks students to indicate their level of confidence in their answer. Course Mastery creates an adaptive, personalized learning plan and cycles the student through a process of test-learn-retest until the student achieves mastery of the material.

CIW Online Exercises

The Online Exercises test knowledge of the topics presented in the course and help students prepare for the certification exam. The Exercises are presented in a variety of formats including flash cards, matching exercises, true-false questions, crossword puzzles and fill-in-the-blank exercises.

CIW Practice Exams (online)

The CIW Practice Exams consist of a variety of tests designed to help reinforce learning and assess the students' knowledge of specific skills objectives. CIW Practice Exams consist of the following:

- **Objective Reviews and Quizzes** — We provide one Review and one Quiz for each CIW exam objective. Each Review and Quiz consists of a collection of randomly selected questions. The Objective Reviews allow students to check their answers while taking the test.
- **Reinforcement Tests** — These tests consist of the entire bank of questions. The Reinforcement Tests allow students to check their answers while taking the test. At the end of the test, they can view their performance on each exam objective.
- **Self-Assessment Tests** — These tests consist of the entire bank of questions. The Self-Assessment Tests assess mastery of the material. At the end of the test, students can view their performance on each objective. They will also receive an e-mail message with this information to enable them to track their progress and concentrate their study on particular sections of each lesson.
- **Practice Exams** — Each of these time-limited tests consist of a random selection of questions covering all learning objectives. The Practice Exams most closely simulate the experience of the high-stakes certification exam.

Note: You can purchase CIW JavaScript Specialist courseware with or without CIW Practice Exams.
