

**THE CIW WEB FOUNDATIONS SERIES**  
 This series of courses is the most popular vendor-neutral Web education program in the world. Individuals who have completed all three CIW Web Foundations Associate courses have mastered more than digital literacy skills. They also have a unique understanding of Internet business, data networking and Web site design. This program transforms Internet consumers into producers of Internet-based technologies.

**THE CIW WEB AND MOBILE DESIGN SERIES**  
 This series is ideal for professionals with some Web development knowledge who work in the fields of Web site design, e-commerce, mobile applications, and graphic design, as well as entrepreneurs who want to be able to develop and manage their businesses online.

**THE CIW WEB DEVELOPMENT SERIES**  
 This series includes the essential combination of a front-end scripting language, a back-end programming language and the skills to integrate them with a database. Because of this diversity, individual who complete this series will become valuable corporate IT team member.

**THE CIW WEB SECURITY SERIES**  
 This series is for those who configure, manage and deploy e-business solutions servers, and implement e-business and network security solutions. An individual can obtain three levels of credential to recognize their proficiency in networking administration and to validate and prove their competence in security.

## CIW — The Industry Standard for Web Technology Education and Certification

CIW is the world's fastest growing vendor-neutral Internet skills training and certification program for students and professionals. More than a certification or a curriculum publisher, CIW is a Web technology standard adopted by academic institutions, governments and businesses worldwide. CIW includes applications and competencies, but our core curriculum focuses on the foundational standards that sustain the infrastructure of IT: Web design, e-commerce, security, networking and databases.
